User

Story 1	Estimate	Status
As a user, I want to quickly find the reports I'm looking for, with the latest data available. Reports need to be accurate and readable. This will allow me to get my work done faster, with less mistakes.	1 week	Finished

Story 2	Estimate	Status
As a data scientist, I want to easily manipulate the data I'm seeing - sorting and filtering are a necessity in my field. Also storing data and checking with previous recorded data is a hugely important factor of my field so we can see what is changing in the data and seeing if we can find similarities between past and present data	2 weeks	In Progress

Story 3	Estimate	Status
As a student, I want to browse scientific data in a pleasing, understandable format. I want a clear, good looking UI. This makes learning easier to me, and it saves me a lot of time, as I know exactly where the specific thing on the web page is.	2 days	In Progress

Story 4	Estimate	Status
As a programmer I want to access the data through an API and work with it using code. This will allow me to create better software.	4 days	Finished

Admin

Story 1	Estimate	Status
As an administrator in my company, I want to seamlessly edit the records in the database. I need a single place where the records can be added, removed or changed, and the updates will be immediately available to my users. This will reduce the frustration of my users, and make dealing with changes in the database easier.	2 weeks	Pending

Story 2	Estimate	Status
As a admin for Data scientists it is my job to record and keep track of all information so that it can be compared to past data, it is critical to my work to be able to manage and restore backups easily without having to go through mountains of files	1 week	Pending
